Required on 6.4L Diesel >14K GVW intended for registration in the following states: CA, CT, DE, GA, ME, NJ, NY, NC, PA. Optional on 6.4L Diesel with Automatic Transmission in all other states. California and affected states require non-exempted vehicles with diesel engines rated over 14K GVW to incorporate an idle shutdown system to prevent extended engine idle periods. After a predetermined period, the engine PCM automatically shuts down the engine and triggers the accessory module to shutdown power to the accessories to minimize battery drain.

Buses, recreational vehicles, and emergency vehicles are exempt from the Idle Engine Shutdown requirement nationwide. Other state-specific exemptions may apply. Selecting this code confirms that the customer intends the final configuration to be exempt.
