Where feasible, the base axle offering has been revised to a lower ratio (i.e. 3.31 or 3.55) to achieve up to 10% better fuel economy. While specific customer driving patterns may alter actual fuel economy benefit, the revised axle ratios provide fuel economy benefit without degrading the rated towing, hauling or payload capabilities of the vehicles. Certain configurations continue to receive higher axle ratio to preserve functional capability (i.e., 471 Camper Pkg, 473 Snow Plow Prep Pkg, & 67H Heavy Duty Suspension Pkg)
