MAJOR PRODUCT CHANGES

To learn more about the features on this vehicle, go to Ford eSourceBook www.fordesourcebook.com

MODEL/SERIES/AVAILABILITY CHANGES

- The TorqShift six-speed transmission (44P) is being replaced with the TorqShift ten-speed transmission (44D)(TR-GG).

OPTIONS ADDED

- None

PACKAGES/OPTIONS CHANGED

- None

PACKAGES/OPTIONS DELETED

- None

ORDER GUIDE UPDATES

- E-Series vehicles will no longer be equipped with an embedded modem. Customers who need connectivity for vehicle data can purchase a plug-in device from FordPro Intelligence.
- Starting with the 2028 Model Year, Ford is beginning a transition away from the three-character Order Codes to a five-character Order Code as part of a larger overhaul of the ordering system aimed at help modernize ordering and bring wholesale, invoicing, and inventory management into one space for all vehicles and customers.
    - Wherever the three-character code is found in this order guide, the corresponding new five character code will be added next to it.
    - The three-character order code will be phased out in the 2030 Model Year.

REGULATORY ENHANCEMENTS

- Beginning with the 2028 model year, the following enhancements to standard features on the vehicle will include:
    - New rating for MY28: 300Hp / 432 ft.-lbs. of torque
    - The 7.3L V8 Gas engine will now come with water-cooled manifolds
    - The 7.3L gasoline engine will now include, as standard equipment, Hardened Engine Intake Valves, Exhaust Valves and Valve Seats previously included in the Gaseous Fuel Prep Pack. This means that any MY28 gas engine can be modified for CNG or LPG.
    - The Gaseous Fuel Prep Package is removed from the program.
    - The Gas exhaust system will include a larger and longer catalytic converter as well as two additional catalytic conveters in line behind the exhaust manifolds. The VIN engraving theft-deterrent option (68B)(F4EAB) will now include the additional catalytic converter housings.

Ford Motor Company will not provide any exhaust or evaporative emissions certificate for 7.3L engines converted to use CNG or Propane fuel. Ford does not represent that a vehicle converted to use CNG will comply with all applicable U.S. or Canadian safety standards. It is the responsibility of either the mid-stage engine modifier or the final stage manufacturer (body-builder, installer, alterer or subsequent stage manufacturer) to determine that any vehicle converted to use CNG complies with U.S. Federal, California or Canadian exhaust and evaporative emission requirements, Federal fuel economy standards, U.S. and Canadian safety standards, labeling and any other requirements. Furthermore, once a 7.3L engine has been converted then the onus of support falls upon the engine modifier, not Ford.

Product Changes and Features Availability

Features, options, and package content subject to change. Please check www.fmcdealer.com for the most current information.
